About this Textbook

This book is for those with experience learning Mandarin but who need confidence interacting in everyday situations. What distinguishes *Let's Speak Chinese!* from other language acquisition guides is the emphasis on practical usage and the promotion of self-learning.

To speak the language with ease, one needs to find the courage to simply ask for what you want in order to receive what you seek. Once you are able to do so, then vocabulary, grammar rules, and intonation will flow more smoothly in your speech.

There are four chapters based on common themes, each illustrating typical dialogue. Now, dive in!

About the Author

Professor Jasmine Tang is a faculty member at SUNY Geneseo, SUNY Monroe Community College and SUNY Empire State College. Professor Tang has been the Distinguished Chinese Language Lecturer in the Department of Languages and Literatures at SUNY Geneseo since 1990. Professor Tang is a nationally recognized and award winning educator, and has been a Chinese language teacher for over 30 years. Professor Tang is also an accomplished author, her latest publication *Let's Speak Chinese* is the first Geneseo Author's Open Textbook, and is also available in print.

Reviewer's Notes

Professor Tang's new textbook, *Let's Speak Chinese!* builds on her well-established tradition of creating user-friendly materials for new and continuing students of Mandarin Chinese. As an instructor of Introductory Chinese in my consulting practice and as a faculty member at the University of Rochester, I have used her *Taking Off with Chinese* (2011) as a classroom staple. I'm now eager to introduce my students to the practical and educational aspects of *Let's Speak Chinese!* Organized in four units (Shopping, Food and Drink, Asking for Help, and Personal Information and Daily Conversation), the text covers key conversation for everyday situations that are likely to be encountered by everyone—students, tourists, business people—in Chinese-speaking environments. What's remarkable about the somewhat deceptive simplicity of the text's design is the effective language-teaching pedagogy behind the practical conversation. Professor Tang keeps phrases relatively brief and simple, yet includes a great variety of language structures and vocabulary so that, gradually, a student will 'intuit' the larger framework and rules of Chinese! As a second language acquisition professional, I really appreciate this text, and I'm looking forward to using *Let's Speak Chinese* in my next class!
